

### Asgn 3 (CS3310 F15) Demo Specs (& Related Notes)

**USE 2-SIDED PRINTING** of output & program code.

**Saves paper & it's easier for grader.**

**ASSEMBLE PACKET IN ORDER SPECIFIED.**

**(Puts grader in a better mood!)**

#### WHAT TO DO FOR THE DEMO

1. You should NOT have to delete Log.txt file since your program takes care of this (i.e., file opened in truncate mode).
2. Run your program JUST ONCE – since the main acts as the “test driver” to run the 11 test cases
3. Print Log.txt file in WordPad or...
  - Use a **FIXED-WIDTH FONT** (like Courier New) so things line up nicely
  - Use a smaller font and/or landscape, if needed, to **avoid** any **wrap-around** in Log file printout
  - *NOTE: The Log file is **ONE LONG FILE** which includes the output from running the program ONCE (which includes the results from all 11 test cases)*
4. Print all of your program code files.

**WHAT TO CIRCLE (by hand with a pen/marker) –** to help the grader

#### **in the Log file**

- The 11 Average Search Path results

#### **in the HashTable class code**

- The 4 HashFunction methods

**WHAT TO HAND IN (in the order specified below)**

1. Cover sheet (fill in the top & sign it)
2. Printout of Log.txt data file
3. Printout of YOUR code files: ***(IN THIS ORDER)*** *(There are at least 6 actual separate files)*
  - The PROGRAM
  - HashTable OOP CLASS
  - any other code files you wrote for your program

**HOW MUCH COMMENTING IS NEEDED?**

- See A1DemoSpecs
